

PLATINUM SCX STAND UP Counterbalanced Truck Series

3,000 / 3,500 / 4,000 lb. Capacities

- 100% AC brushless motor system includes hydraulic motor and dual drive motors
- AC controller works in conjunction with the LCD display for program settings and on-board diagnostics
- Self-diagnostics maximize uptime, by checking critical functions at truck start-up and continuously during operation
- Three pre-set operating modes ranging from economy to high performance available
- Operator password provides secure access to customized performance profiles
- Quiet, load-sensing hydraulic power steering provides greater control and with less effort
- Ergonomically designed, multi-function handle controls travel direction, lift/lower, tilt, auxiliary functions and horn
- Large 18" diameter poly drive tires and cushioned floorboard mounted on vibration isolators result in a smoother, more comfortable ride
- Low 7" step height ideal for repetitive on/off tasks
- Comfortable side stance design with sloped floorboard
- Dual foot pedal design to reduce risk of operator foot injuries
- Automatic speed reduction limits travel speed and tilt while driving with forks above free-lift
- Anti-rollback maintains truck position on a grade
- On-board diagnostics and error code reporting simplifies maintenance requirements

Optional Equipment

- Headlights
- Rear work light
- Convenience package with compartment light and fan
- Knee/leg cushion
- Freezer package offers protection down to -20°F (-29°C)

PLATINUM SCX SERIES

The flexibility and rugged design of Nissan's Platinum SCX Series offers the ideal solution for your busy warehouse operation.

Among its energy-saving features, the SCX offers an **Auto-Power Off** function, automatically shutting down the truck's system after no operator commands are received.

All motors and controllers include standard **thermal protection**, promoting an efficient and productive operation, while protecting key components.

An Operator Presence System requires both pedals be actuated to power truck. Its routine start-up sequence ensures the brake switch is functioning properly.

A non-slip cushioned floor mat rides on three rubber vibration isolators to dampen the impact when riding over dockplates or floor joints.

Optimize productivity and efficiency

Select one of three pre-set performance modes, or create your own by modifying travel speed, acceleration rate, or lift speed settings that suit your operators and your operation the best. Create up to five PIN access codes to store custom performance parameters to optimize productivity and battery efficiency.

Low 7 $\frac{3}{4}$ " step height offers relief for operators when daily tasks require repeated entry and exit throughout the shift.

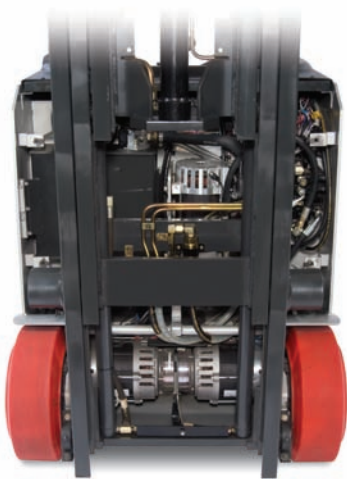

Comfort is key

A quality driving experience is achieved thanks to Nissan's focus on the operator. The SCX Series' side stance design includes a gently sloped floorboard as well as padding at various operator touch-points, including arm, back and hip. Other conveniences, such as a compartment light, fan and an optional cushion for the driver's knees, deliver even more ways to keep the operator comfortable and productive.

Convenience and control

Hydraulic power steering results in precise control—especially useful in confined spaces—while an on-demand design means less battery power is needed. With an intuitive multi-function handle, the operator can accomplish tasks with greater efficiency.

Reliable designs deliver value

Two independently controlled AC drive motors produce superior performance characteristics, while offering enhanced battery efficiency and reduced maintenance. An automatic self-check provides realtime status, while its on-board diagnostics save time and money by quickly identifying potential service requirements.

Outstanding visibility

Wide canopy channels and an angled crossbar produce greater visibility at higher lift heights for increased operator confidence and improved productivity. Lower front profile offers enhanced fork tip visibility.

PLATINUM SCX SERIES

Perfect Balance Achieved

The newest addition to Nissan Forklift's family of warehouse products, the Platinum SCX Series was created with a 360° focus by addressing the needs of the Owner, the Operator and the Environment.

These powerful electric trucks are an ideal alternative to sit down forklifts. Thanks to their performance and maneuverability, the SCX Series trucks deliver exceptional versatility to work in a variety of operations including dock, rack, pallet transfers, and even confined work areas. And their 100% AC system means greater productivity and lower operating costs.

And because the Platinum SCX Series forklifts are manufactured by Nissan, you can rely on the durability they'll provide year after year.
